TECHNICAL DETAILS

DESCRIPTION:

Ski jacket made of a precious 4way stretch fabric with recycled nylon fiber and a high percentage of elastomer to facilitate comfort and freedom of movement. Interior in 200 g Comfortemp soft wadding with 60% recycled fiber and back in waterproof and breathable 5L laminated fabric with channel construction that allows the insertion of DWR down without seams to guarantee waterproofness and high technicality. The jacket belongs to the top of the range of the extra warm category for thermal insulation, function, technicality and attention to detail, it is in fact fully equipped both externally and internally. Ideal garment for the coldest days for an essential but refined look.

TECHNICAL DETAILS

DESCRIPTION:

Ski jacket with detachable hood in two mechanical stretch fabrics made of 100% recycled polyester fibre, waterproof and breathable laminates that play on different aspects, one smooth and one structured rispstop. The hood has a comfortable gusset to better adapt to the helmet. Inside, a soft stretch lining guarantees optimal comfort while the Clo Univa Eco 133g wadding with 93% recycled fibers from post-consumer sources provides the right degree of warmth. Thanks to its numerous accessories this garment is extremely functional and versatile.
