## TECHNICAL DETAILS

### DESCRIPTION:

Ski jacket made in a precious 4way stretch fabric with recycled nylon fiber and a high percentage of elastomer. The fabric is made with recycled nylon fiber only in the colored combos and not in the white color combo. Interior in 200 g Comfortemp soft wadding with 60% recycled fiber and back in waterproof and breathable 5L laminated fabric with channel construction that allows the insertion of DWR down without seams to guarantee waterproofness and high technicality. The jacket belongs to the top of the range of the extra warm category for thermal insulation, function, technicality and attention to detail, it is in fact fully equipped both externally and internally.

## TECHNICAL DETAILS

### DESCRIPTION:

Ski jacket in waterproof and breathable SL fabric with special channel construction that allows the insertion of DWR down without the need of stitching for maximum comfort and maximum technicality. Extremely warm and enveloping garment from the extra warm category which, thanks to the stretch lining with graphene fibres, will allow excellent heat conservation and dissipation. Recco reflector and seamless neck warmer are just some of the numerous accessories present in this perfect garment for skiing with a classic look.

CAPISPALLA

## TECHNICAL DETAILS

### DESCRIPTION:

Ski parka in precious waterproof and breathable 4way stretch fabric, with recycled nylon fiber and a high percentage of elastomer. The fabric is made with recycled nylon fiber only in the colored combos and not in the white color combo. Back and underarm in waterproof and breathable stretch softshell. Homogeneous heat distribution provided by the 140g Ecosoft wadding (85% recycled) thanks to the comfort lining with graphene. The jacket belongs to the top of the range for thermal insulation, function, technicalityl, it is in fact fully equipped both externally and internally and embellished with a soft synthetic fur in recycled polyester fibre.

## TECHNICAL DETAILS

### DESCRIPTION:

Extremely versatile reversible jacket. The more technical external side is in extremely light mini ripstop textured nylon with a breathable and waterproof membrane. The internal part is made of soft matte polyester fabric with a peach touch and water-repellent treatment. The Comfortemp Fiberball 60gr wadding, 70% recycled, provides ideal thermoregulation. The reversible zip on the outside is waterproof. In a single garment we achieve the adaptability of a piece that can be worn in different situations.

## TECHNICAL DETAILS

### DESCRIPTION:

Ski pant with internal gaiter made of stretch softshell fabric with breathable membrane which guarantees 10,000 mm of water column. The ergonomic cuts allow for an optimal fit thanks to the elasticity of the fabric. It is a very comfortable and dynamic garment that will allow you to live your moments on the snow in style.

## TECHNICAL DETAILS

### DESCRIPTION:

Ski jacket that will be worn by the athletes of the Slovenian Federation for the FW24 season, in waterproof (15,000 mm) and breathable (15,000 g / m<sup>2</sup> / 24) mechanical stretch fabric of 100% recycled polyester with a very modern color block design. The 150g wadding with 94% post consumer recycle fibers provides the right degree of warmth. The use of recycled wadding and fabric and the EcoElite eco-friendly water repellent treatment is part of the Colmar Green Path project to respect the environment. The colorblock has been updated in a unique and modern style
